DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1, claims 1-6, 9 and 10 are directed to a method/apparatus/program product for determining the recording positions for the file data blocks on a recording medium then write said file data blocks to said recording positions, wherein said file data blocks are separated by a "block gap" based on an "additional data" associated with said file data blocks. Said method/apparatus/program product further incorporate the reading of said file data blocks from said recording medium and determines the recording positions of said file data blocks then inhibits the reading if there is an error.

Species 2, claims 7-8 and 11 are directed to a method/apparatus product for reading the data file blocks from a first recording medium and determines the recording positions of said data file blocks on said recording medium, then extract the "additional data" associated with said file data blocks. Said method/apparatus product further incorporates determining said recording positions of said data file blocks on a second recording medium and writes said file data blocks to said recording positions on said second recording medium.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 5809.02(a).

Should applicant traverse on the ground that the species are not patentability distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2182

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
